

## **Cleanflow 650ML Automatic Stainless Steel Liquid Soap Dispenser - IFS61S**

This battery operated automatic, 650ml capacity bulk liquid soap refillable stainless-steel dispenser has a single chip microcomputer design meaning ultra-low energy consumption. Touch free operation prevents cross contamination and bacteria transfer. The amount of soap dispensed per sensor activation can be adjusted to be between 0.8ml and 6.5ml. A waterproof construction protects the electronic components and its suitable for public places such as hotels, schools, hospitals etc. The sensor can be adjusted between 5-15cm allowing for customising in various locations. A lockable upper lid, with key included, prevents misuse.

Power supplied by 6 x AA alkaline batteries. Easy installation includes fixing the wall mount first and then attaching the dispenser to the mount. The dispenser is securely fastened to the mount via an anti-vandal screw.

Screws and plastic plugs supplied to mount on a smooth, clean wall.
